Emergency and Critical Care
& Specialty Medicine

WELCOME TO

We are a family of premier veterinary Specialty, Emergency and Critical Care Hospitals comprised of board-certified veterinarians, licensed veterinary technicians and highly trained support staff who provide advanced and comprehensive specialty care for pets in partnership with your primary care veterinarian. AVS doctors have provided over 16+ years of exemplary emergency & specialty services to NE Florida, Central Florida, GA and surrounding areas.

OUR MISSION

To empower the practice of medicine and hospital operations as a unified team who provide the best care and patient experience for pets while harnessing a rewarding teamwork environment.

HOW DO I SCHEDULE MY PET'S FIRST APPOINTMENT?

Call one of our (2) locations closest to you to schedule your pets consultation. Alternatively, your veterinarian can schedule your pet's first appointment. Patients referred to us will return to their family veterinarian once treatment is complete.

What fees should I expect when I bring my pet to AVS?

There is a consultation fee with the emergency doctor and/ or specialist to gain hands on examination, thereafter, they will provide an estimate to help improve your pet's health. There is a deposit due at the time of the treatment and then the remaining balance is due at the time of discharge.

Further Questions?

Check out our website: www.AlliedVeterinarySpecialists.com

Or call one of our locations to speak with a member of our Team.

WHY CHOOSE US AND WHAT ARE THE NEXT STEPS

The founders of Allied Veterinary Specialists hired one of the first Board Certified Veterinary Anesthesiologists in private practice and to this end, have built one of the safest anesthesia departments with primary focal points on pain and anti-anxiety management.

AVS veterinary specialists have not only received a doctor degree in veterinary medicine but have also completed four to five additional years of specialty training consisting of internships, research fellowships and a residency to become board certified in their specialty. Additionally, our board certified specialists have passed their American College of Veterinary Specialty board exam which awards them diplomate status.

We provide our excellent pet care through Specialists all under one roof, the large amount of hospital resources available from fully equipped surgical suites, advanced anesthetic monitoring equipment, recovery rooms, a dedicated intensive care unit, telemetry, pharmacy, oxygen therapy, diagnostic radiology & ultrasound, CT Scanner/MRI, and a full bloodwork laboratory.

Once your pet has been diagnosed with a condition that may require specialty or emergency care and referral to AVS is recommended, your next step is to schedule a consultation with one of our specialists. We deliver personalized and thorough consultations that include a complete review of your pet's medical records and a comprehensive physical exam. Thereafter, your specialist will spend time talking with you to learn about your concerns regarding your pet's health. These consultations will direct a clinical treatment plan and is coupled by advanced diagnostic testing in our state-of-the-art hospitals.

Emergency & Critical Care

AVS provides **24-hr Emergency Care**; including dedicated overnight staff to ensure continuous care for your pet who may have been in for Critical Care, Surgery or to see one of our Specialists. Our Teams utilize advanced technology and expertise to diagnose, treat and monitor your pet in need of immediate medical attention.

We understand that pet emergencies can be stressful, we prioritize efficient triage and diagnosis, offering clear communication about treatment options and status updates.

Emergency and Critical Care services can include:

Sudden Illness	Pain and/or Trauma
Oxygen Therapy	Snakebite and/or Toxicity Monitoring
IV Nutrition	Vomiting/Nausea
Transfusion Medicine	Changes in urination and/or bowels

Specialty Care
